## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 08 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Objections*

1. Claim 3 is objected to because of the following informalities:

In claim 3, line 2; delete [les]. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cloutier (U. S. PAT. 5,892,962).

In claim 1, Cloutier teaches all claimed features in Figs. 1 and 2, component with a dynamically reconfigurable architecture for processing data (Fig. 1) comprising a data processing block TD (102) and a general controller CG (106, 108, 110, 112, 114 and a host computer) capable of controlling the data processing block TD characterized in that: the block TD comprises a plurality of reconfigurable elementary data processing blocks BE (104s); each elementary block BE comprises two inputs, E1 and E2 (Fig. 2, EAST CONNECTION and WEST CONNECTION) for reception of data to be processed, and one output S (Fig. 2, NORTH CONNECTION) for transmission of processed data; a common input data bus (global bus 114; col. 2, lines 56-59) being capable of transmitting data to be processed to the input E1 of each of the blocks BE (104) and the controller CG (106, 108, 110, 112, 114 and a host computer); for each block BE, an

Art Unit: 2819

output data bus connected to its output S (SOUTH CONNECTION), being capable of transmitting processed data outside the component and through a bypass data bus to the input E2 of a single other block BE (from an upper left corner 104 to a bottom left corner 104); the controller CG is capable of initializing configurations (col. 6; lines 35-40) of blocks BE and controlling their dynamic reconfiguration, controlling data flows (performed by 106, 108, 110, 112, 114 and a host computer) at the output from each block BE so as to transmit data either towards the outside or to the input E2 of another block BE, and controlling data flows at the input of each block BE.

4. Claims 2-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Claim 1 is now rejected under 35 U.S.C. 102(b) as being anticipated by Cloutier, as set forth in above detailed action.
